

Saturday 8th May 2010
09.00 – 15.45 hrs

L'olécrane – Der Ellbogen
The Elbow - Il gomito

Dear Colleagues

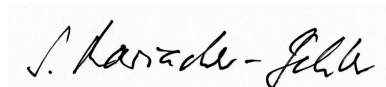

we have the great pleasure to invite you to the fifth Schinznacher-Ultrasound Course that will be held in the aarReha Clinic, Schinznach-Bad, Badstrasse 55, CH-5116 Schinznach-Bad, the 8th May 2010. This year's topic is «*Ultrasound of the elbow: normal and pathologic*».

Like in the last year, the program will start in the morning with several theoretical lectures including a live demonstration focusing on the standardized technique of US examination of the elbow. The remaining lectures will present the elastography of tendons, soft tissue and muscle, is there a benefit for musculo skeletal ultrasound. We will close our lectures with US-findings of muscle.

In the afternoon four hands-on workshops are programmed in which all participants will be able to examine patients presenting with some elbow disorders and other joints under the guidance of experienced tutors. This part of the Course is deliberately practical and you will have the chance to learn several tips and tricks about US scanning from our tutors.

You will find enclosed a program with all details as well as several practical informations.

We hope to see you next May at Schinznach-Bad.

Dr Stefan Mariacher-Gehler

PD Dr Stefano Bianchi

Program

08.30 – 09.00 Coffee

09.00 – 09.10 Welcome
Dr Stefan Mariacher-Gehler and PD Dr Stefano Bianchi

Lectures

09.10 – 09.50 US Anatomy and technique of examination of the elbow
Live Demo.
PD Dr Stefano Bianchi and Dr Stefan Mariacher-Gehler
